

Passion to create Electronics

FUNKY

Compact plug&play temperature controller designed for insert and stove.

1 INPUT

Appliance Probe
Appliance Thermostat

FEATURES

Operating: Manual / Automatic / Proportional
Auto safety protection
Self-calibration
Complete Customization

1 OUTPUT

Heating Fan
Up to 3 fan speeds

Small size. Great comfort.

AirTrack

Primary air controller with app control for optimized airflow and improved combustion efficiency.

1 INPUT

Appliance Probe
Door Contact
Room Probe
Chassies Probe

FEATURES

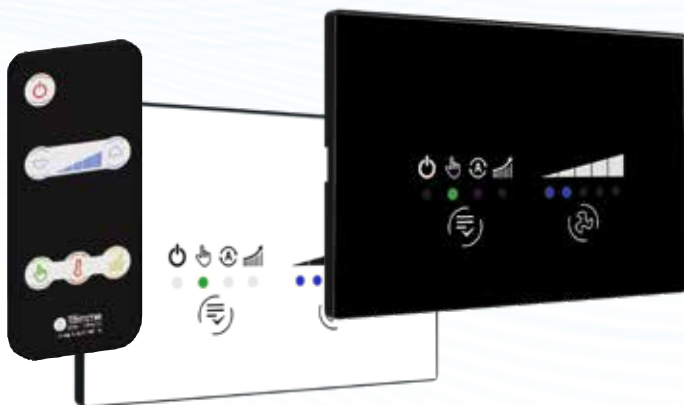

Primary Air Management
Combustion Control
Complete Customization

1 OUTPUT

Modulating Air Damper

Smart airflow control. Optimal combustion.

Modern design. Touch control.

FUN30

Modern temperature controller designed for fireplaces, inserts and stoves, combining advanced control with a sleek design.

2 INPUT

Appliance Probe
Room Thermostat

FEATURES

Operating: Manual / Automatic / Proportional
Safety protection
Self-calibration
IR Control
Complete Customization

1 OUTPUT

Heating Fan
Up to 5 fan speeds

Passion to create Electronics

FUN80

Advanced temperature controller with display
Extended inputs and outputs for complete
system management.

2 INPUT

Appliance Probe
Room Probe
Room Thermostat
Door Contact

FEATURES

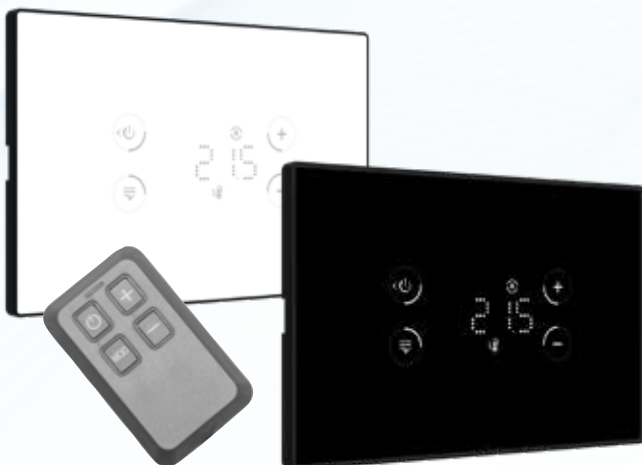

IR Control
Operating: Manual / Automatic / Proportional
Safety protection
Primary Air Management
Complete Customization

2 OUTPUT + 1 PWM

Heating Fan
Up to 10 fan speeds
PWM Heating Fan
Service
Modulating Air Damper

Complete control with smart display.

Total control with smart connectivity.

WiFIRE_AIR

- Full system control from anywhere
- Remote monitoring and adjustment via app
- Smart heating management wherever you are

3 INPUT

Appliance Probe
Room 1 Probe
Room 1 Thermostat
Room 2 Probe
Room 2 Thermostat
Door Contact

FEATURES

Radio Control
Wi-Fi Control
Operating: Manual / Automatic / Proportional
Safety protection
Primary Air Management
Complete Customization

3 OUTPUT + 1 PWM

Heating Fan
Secondary Heating Fan
PWM Heating Fan
Service
Modulating Air Damper

TC40

Temperature controller with display and extended inputs and outputs for complete management of the heating and domestic hot water system.

3 INPUT

- Fireplace probe
- DHW probe
- Buffer tank probe
- Room probe
- Water Level Switch
- Solar collector probe

FEATURES

- IR Control
- PWM Pump
- Primary Air Management
- Hydraulic system configuration
- Complete Customization

5 OUTPUT +2 PWM

- Heating system pump
- Solar Pump
- DHW Pump
- Mixing Valve
- Backup heating source
- Modulating Air Damper

Complete control with smart display.

Smart connectivity. More configuration options.

TAKING SHAPE

TC800

Modern temperature controller designed for fireplaces, inserts and stoves, combining advanced control with a sleek design.

5 INPUT

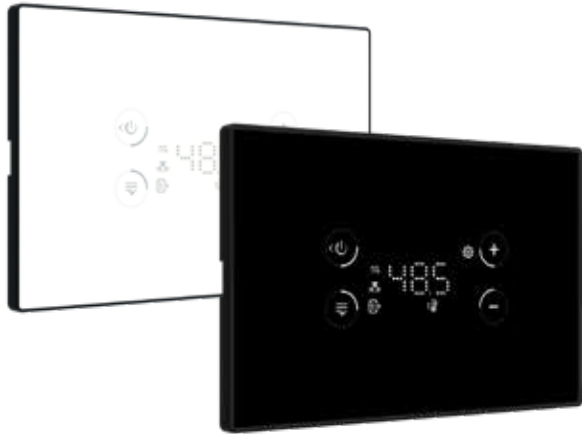

- Fireplace probe
- DHW probe
- Buffer tank probe
- Room probe
- Water Level Switch
- Solar collector probe

FEATURES

- Radio Control
- Wi-Fi Control
- PWM Pump
- Primary Air Management
- Hydraulic system configuration
- Complete Customization

6 OUTPUT +2 PWM

- Heating system pump
- Solar Pump
- DHW Pump
- Mixing Valve
- Backup heating source
- Modulating Air Damper

WiFIRE_Hydro

- Full system control from anywhere
- Remote monitoring and adjustment via app
- Smart heating management wherever you are

3 INPUT

Fireplce probe
DHW probe
Buffer tank probe
Room probe
Water Level Switch
Solar collector probe

FEATURES

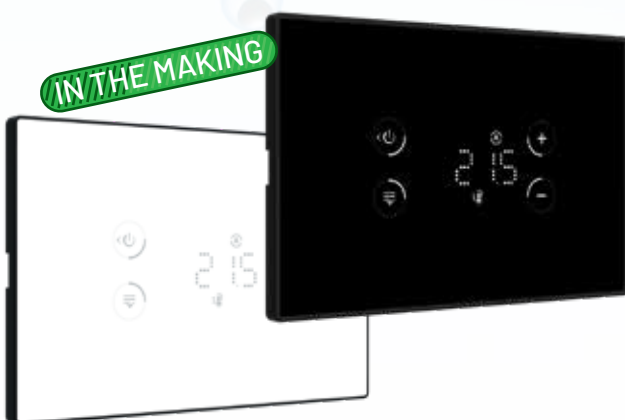

Wi-Fi Control
PWM Pump
Primary Air Management
Hydraulic system configuration
Complete Customization
Radio Control

5 OUTPUT +2 PWM

Heating system pump
Solar Pump
DHW Pump
Mixing Valve
Backup heating source
Modulating Air Damper

Total control with smart connectivity.

Total control with smart connectivity.

WiFIRE_Solar

- Full system control from anywhere
- Remote monitoring and adjustment via app
- Smart heating management wherever you are

3 INPUT

DHW probe
Buffer tank probe
Solar collector probe

FEATURES

Wi-Fi Control
PWM Pump
Hydraulic system configuration
Complete Customization
Radio Control

5 OUTPUT +2 PWM

Heating system pump
Solar Pump
Mixing Valve

TurtleHUB

NOW UNFOLDING

Smart connectivity hub with built-in Wi-Fi, enabling instant system connection without external accessories.

Built-in Wi-Fi. Just connect and control.

4HEAT HUB

IoT platform hub designed for real-time system management via app and web interface. Provides fast data processing and real-time control of your heating system.

MEM21 & MEM01

Expands your motherboard with additional I/O for flexible system configurations.

More inputs & outputs. More possibilities.

Modbus Interface

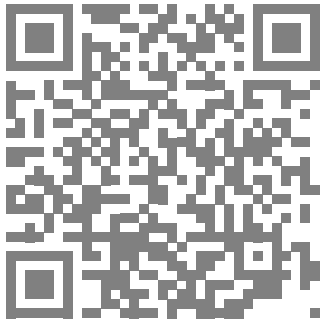

The Modbus interface module allows the control of heat pumps, PLCs, and smart controllers.

Air Flow Sensor

Integrated onboard sensor that monitors air flow in real time to optimize efficiency and combustion.
